To whom it may concern:

I am writing you regarding a lawsuit I found on the internet regarding Norplant. I had Norplant put in my arm in 1993. Mary Bradish was the mid-wife who performed the procedure. After several months of extremely heavy bleeding (I was bleeding 28 out of 30 days)I requested that she remove this from my arm. She refused and said that I would become pregnant with in the next year and that there was nothing wrong with me all I had was psychological problems. Having never been told this before I was quite shocked I thought this was very unprofessional. She told me if I wanted it out I would have to go some where else to have this done. I finally went to Planned Parenthood and they did remove this. If you could please send me more information on what actions I need to pursue I would appreciate it.

Thank you.

Sincerely,

Sherie Grotzinger
